DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: the phrase "he" appears to be wrong and should read "the". Appropriate correction is required.
2. Claim 11 is objected to because of the following informalities: the phrase "treating the a set of opposed edges" is confusing, the Examiner suggest deleting " the" or "a". Appropriate correction is required.
3. Claim 12 is objected to because of the following informalities: the phrase "moves each the module" is confusing, the Examiner suggest deleting "each" or "the". Appropriate correction is required.
4. The Applicant is reminded to review the remaining claims for such grammatical errors as pointed out above by the Examiner.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

6. Claims 1-3, 6, and 23-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Baltes EP Patent 0 297 684 A1.

Baltes teaches all the limitations of the above claims including an apparatus with an shear or hot air gun (10), other treating head (4), for moving over flooring module (3), upper and lower surfaces of module (3) creating beveled surface (6, see Figure 2), and

Art Unit: 3637

a method of positioning the hot air gun on the carriage (1) and moving across the floor covering (3), maintaining first reference structure (2) and second reference structure (12, 13) rotatable or hinged (column 2, lines 24-27).

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-56 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 09/766,754. Although the conflicting claims are not identical, they are not patentably distinct from each other because on page 5, line 15 of the instant application the Applicant discloses that using any of the methods would produce the same results, and further on page 6, line 25 the Applicant discloses "a wide variety of techniques". Further, the instant applicant teaches the use of the above copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
